2.17 Utilities

Subsequent to the Record of Decision (ROD) for the 1996 FEIS, property for the Preferred Alternative was acquired and utilities were adjusted and/or relocated to accommodate construction of the proposed action. Table 2-20 identifies the type and location of these new utility crossings. The exceptions are a gas main at Davey Road and a Commonwealth Edison high voltage transmission tower line in the Des Plaines River Valley area. Subsequent to property acquisition, several permits affecting the proposed action have been granted for new utility crossings.

Table 2-20 Utility Permits Granted after Publication of the 1996 FEIS		
Utility/Community	Description	Location
Citizens Utility of Illinois	91 cm (36 in) water main in 152 cm (60in) pipe	I-55 between Joliet Road and I-355
